

Setting up a Padlet

1. Go to padlet.com and log in.
2. On the left side of the screen click on “Make a Padlet”.

3. Choose which style of Padlet you want to make. (see more on this later)

4. Choose “wall” for right now.

5. On the right side of the screen you will see a panel where you can now modify your Padlet.

6. Change the Padlet name, add a description, and choose the wallpaper (background), color scheme, and fonts.

7. Scrolling down in that menu panel you can also set-up filtering (I turn this on), and I usually put the newest post first (because beginners will think their post didn't actually post.)

8. I usually don't activate moderation but consider your users to decide.

Continue Setting up a Padlet

9. Consider all the settings and explore your options.

Now, about the format options:

Each format has a simple description below it on the screen. I find wall, shelf and canvas are my most used formats, canvas is useful for sorting or reorganizing things. Samples linked below.

Canvas: <https://padlet.com/glovely/gotolunch>

Wall: <https://padlet.com/glovely/blue>

Shelf: <https://padlet.com/glovely/wildrobot>

Padlet of Padlets: <https://padlet.com/glovely/colorfulworld>
