

Force Copies in Google Tools

Use this to edit links to Google Tool Materials
(like Slides, Jamboards, etc.)

1. Sign in to your Google Account.
2. Find the “thing” you want to share as a fresh copy.
3. Make sure the share settings are set correctly. (Share with anyone who has the link can edit.)

4. Copy the link...
5. In this link you would delete the bold part:
[https://jamboard.google.com/d/1ppZNSvZQn-JjKlpTVfiSZGjPf1ft-Lr4-zPwDHBMXME/**edit?usp=sharing**](https://jamboard.google.com/d/1ppZNSvZQn-JjKlpTVfiSZGjPf1ft-Lr4-zPwDHBMXME/edit?usp=sharing)
6. Remove all of the link from “edit” to the end of the link:
<https://jamboard.google.com/d/1ppZNSvZQn-JjKlpTVfiSZGjPf1ft-Lr4-zPwDHBMXME/>
7. Add “copy” to the end of the new edited link.
[https://jamboard.google.com/d/1ppZNSvZQn-JjKlpTVfiSZGjPf1ft-Lr4-zPwDHBMXME/**copy**](https://jamboard.google.com/d/1ppZNSvZQn-JjKlpTVfiSZGjPf1ft-Lr4-zPwDHBMXME/copy)
8. Share this new link (I always check it before sending it to others.)
